

THE INLETS
200 Inlets Blvd. - Nokomis FL 34275

GUIDELINES FOR CITRUS/FRUIT TREES

Widespread diseases may develop from time to time, which may affect a tree on your property. In order that the Florida Department of Agriculture can control such diseases, we need to have property owners list any such trees on your property so that you can be contacted in such event.

Please describe each tree and location below:

An overall listing will be kept in The Inlets office available to the Florida Department of Agriculture who will advise The Inlets of any problems to be treated.

HOMEOWNERS ARE RESPONSIBLE FOR THE MAINTENANCE OF THEIR CITRUS/FRUIT TREES. HOME OWNERS MUST REMOVE FALLEN FRUIT FROM THE GROUND SO THAT IT DOES NOT ATTRACT RATS AND SNAKES AND DOES NOT IMPEDE THE LAWN MOWING OPERATION OR DAMAGE SUCH EQUIPMENT.

Homeowners are encouraged not to have citrus/fruit trees on their property and such trees are not permitted on the front lawns. Trees need to be planted in planted areas and not placed in grassy areas where it will impede the lawn mowing
